

Monitoring weight gain through feeding palaMOUNTAINS Revive

TESTING

Charlie Duncan - Hunterville

"Otiwhiti Station Hunterville have now been using the palaMOUNTAINS Revive products for two seasons and have found this product an important part of our animal health program for getting the best results and improved returns for the station. I would certainly recommend that farmers take a serious look at including palaMOUNTAINS Revive into their sheep & beef stock health programme for this coming season."

*Ewes fed a drenching programme of 30ml pre and post tugging and lambs given 10ml at docking. Very little signs of dags on either lambs and ewes.

**98 DAY OLD LAMBS
